

AutoStart

Automatic Program Launching Utility

Overview

Innotech® *AutoStart* is an automatic program launching utility designed primarily for use with *Gen2Xtract* and *MAXtract* software. It allows any number of Windows® batch programs to be automatically started at regular time intervals. It is aimed at users who wish to regularly extract log data from *Genesis* or *MAXIM* series controllers.

AutoStart is a user-oriented product. A simple Graphical User Interface generates the command line parameters required by *Gen2Xtract* and *MAXtract*.

Applications

- Automatic regular, extraction of log data from *Genesis* and *MAXIM* series controllers
- Scheduling of user-specified programs

Specifications

- Distributed on one CD
- Is supported by Windows® Vista Business 32-bit & XP Professional 32-bit
- Requires customer registration on installation
- Minimum PC specifications:
Intel® Pentium® III/500MHz or compatible CPU. 256 megabytes (MB) of RAM. 100 megabytes (MB) of available hard disk space. Video adapter and monitor. CD-ROM or DVD drive. Keyboard and Microsoft® Mouse or compatible pointing device.
- Uses *Innotech iComm Server* to access devices

Record Name	Next Start	Command Line
MPREM 3AD Test	30/02/2006 11:12:01 AM	C:\PROGRAM~1\INNOTECH\Gen2Xtra 520\gen2tra.exe /AUT...
Maxim Log	29/02/2006 3:15:27 PM	C:\PROGRAM~1\INNOTECH\MAXtract 530\maxtract.exe /AUT...
R/D DDC	<Disabled>	C:\PROGRAM~1\INNOTECH\Gen2Xtra 520\gen2tra.exe /AUT...
Disk Cleanup	29/02/2006 5:00:00 PM	C:\WINNT\system32\cleanmgr.exe
Disk Defragmenter	6/03/2006 6:00:00 PM	C:\WINNT\system32\defrag.exe
